

Grow Your Restaurant with YUMA ONLINE

Introducing a platform independent
POS solution that makes online
ordering painless.

YUMA ONLINE is a full-service online ordering solution that helps your restaurant acquire more customers, provides a better user experience and helps you manage takeout and delivery orders with ease.

Deliver a beautiful online ordering experience with your own e-commerce website, IOS and Android mobile app. Once an online order is placed, the order notification is sent directly to your dedicated online ordering terminal, that sits directly at your "TOGO" station.

WITH YUMA ONLINE YOU GET

- ▶ Branded e-commerce website, IOS & Android mobile app
- ▶ 100% commission free. Customer payments are deposited directly into your bank account.
- ▶ Dedicated online ordering terminal with real-time order notifications.
- ▶ Marketing & Promotional tools including push notifications, email marketing, marketing automation, loyalty programs, rewards and a ton more customer engagement tools.
- ▶ Management tools including menu changes,, price changes, daily specials, hours of operation, multiple locations, events, delivery zones and a ton more!

YUMA ONLINE works seamlessly along side of all POS systems, including Positouch, NCR Aloha, Micros and Dinerware.

Lightning fast ordering process that works across all devices, rather web or mobile, that provides an easy to use and convenient ordering process for your staff and your customers. All orders from the web and mobile apps are sent directly to your dedicated online ordering terminal. This terminal is conveniently located at your "TOGO" station

-- We are able to run our staffing levels efficiently, without compromising online ordering because of the portable hardware that the software is installed. This allows me to move the terminal, which is a lightweight tablet to my bartender or hostess during low volume hours. --States: Ash E.
